UHF Adhesive Transponder

LF Glass Transponder

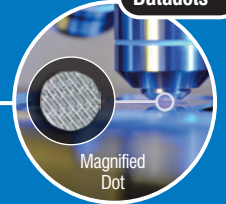

LF Adhesive Transponder

Unique Plant Identification Plate

Datadots®

Magnified Dot

Forensic DNA

Unique Plant Identification Plate

These specially designed tamper-proof labels feature many hidden security features and carry a unique plant identification alphanumeric number to deter theft and ensuring that your property can be quickly identified and returned in the event of theft.

Datadots® with Forensic DNA

Our Datadot® identification system can be applied all over the asset and to almost any surface, making it virtually impossible to locate and remove them all. The UV fluorescent adhesive the Datadots® are suspended in also contains a totally unique forensic DNA meaning every last spec of adhesive can be used to identify an asset.

LF Glass Transponder

Roughly the size of a grain of rice it can be easily installed in seating, wiring looms and head linings. It also contains a unique code number permanently programmed which cannot be altered or deleted.

LF Adhesive Transponder

This flexible transponder is often disguised or hidden on assets and contains a unique code, permanently programmed into its integrated circuit, which cannot be altered.

UHF Flat Transponder

This flexible transponder which can be placed on or off metal contains a unique code, permanently programmed into its integrated circuit, which cannot be altered or deleted. Featuring a 'long' read range it is the ultimate ultra high frequency RFID transponder in the fight against theft.
